

JORDAN HERRERA

WEB DEVELOPER

ABOUT

Engineering student with a strong background of over two years in Frontend development. I have completed multiple projects involving various technologies, focusing on creating intuitive, responsive, and functional interfaces.

EXPERIENCE

Jr. Web Developer - Netlancers

January 8, 2024-Present day

Development, design, and maintenance of websites implementing technologies such as JavaScript, SQL, Laravel, Livewire, PHP, GIT, jQuery, CSS, and Bootstrap

PROJECTS

Photoverse

Photoverse is a full-stack social network that harnesses the power of Laravel, Tailwind CSS, and Livewire to create a robust and visually appealing platform. Supported by an SQL database.

Arch Studio

Developed a 4-page website with map APIs using React Leaflet. I implemented form validation and designed the interface using Tailwind UI for an engaging user experience.

Audiophile E-commerce

An e-commerce front-end application that allows browsing products, managing the cart, and completing purchases with validation. It maintains the cart state after a restart. Developed with React, TypeScript, and Tailwind CSS.
